Guarantee period (if any): N.A.

Implementation stages of the European Union technical assistance project (if any): -

Short description (goals) of the project:

The project is aimed at creation of adequate conditions for cross-border mobility of people and goods by climate-proof transport (e-vehicles) via development of accessible free public infrastructure in the border regions. It meets the programme goal as it seeks to intensify cooperation of the regions to initiate progress on the fields of existing economic, infrastructural and environmental issues: in the long-term the project will lead to emission and noise pollution reduce by development of e-transport, gradual replacement of conventional vehicles by eco-friendly ones, increase of the regions' energy independence from hydrocarbon fuels used for transport. It is consistent with the programme's specific objective as its key idea is to improve accessibility to the regions by e-vehicles complicated today due to actual absence of adequate infrastructure, to change attitudes of local people convincing them about benefits and perspectives of e-vehicles both for reasons of cost efficiency and environment.

International agreement, under which the project of European Union technical assistance is implemented: Financing Agreement accounting number ENI-CBC/2015/039-031 between the European Commission and Government of Ukraine for the Joint Operational Programme of the Cross Border Cooperation Programme Hungary-Slovakia-Romania-Ukraine 2014-2020.
